SUMMARY

BDR generating outbound pipeline for B2B SaaS — \$500K qualified enterprise pipeline at Branch, 200% peak individual quota at Wayground (formerly Quizizz), now leading a 15-rep team at 110% attainment. Full-cycle, consultative sales background before moving into SaaS outbound. Known for signal-driven selling: built an AI copilot that mines prospects' board minutes and improvement plans so every conversation opens on the buyer's stated priority, not a template.

- **Built BDR Sidekick, an AI call copilot adopted team-wide** that mines board meeting minutes and improvement plans across 10,400+ prospect accounts into a per-account opening question and discovery path — the same signal-driven approach that shapes every conversation before the first word is said.
